

MO KENNEY

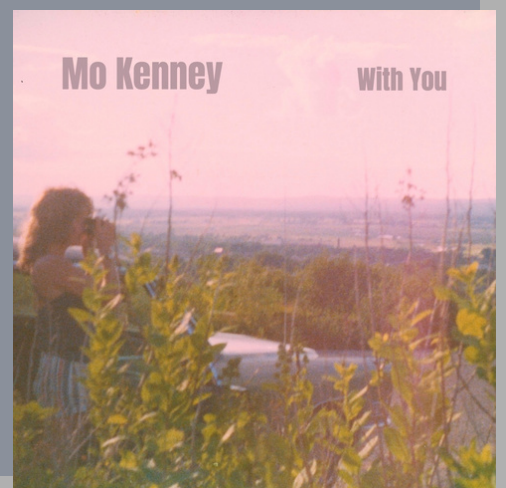

Kenney's willingness to unflinchingly pursue their artistic impulses on their own terms has resulted in numerous accolades over the past decade, including a SOCAN Songwriting Prize, a nomination for Juno Adult Alternative Album of the Year, and too many East Coast Music Awards and Nova Scotia Awards to count.

2021's "Covers", was an acoustic collection that offered a glimpse into the molecular musical composition of the artist interpreting them. 2022 release, "With You", was written, played, and produced by Kenney alone. 2023 will see the release of a new album of original material.

One of the most refreshing things about Kenney is that their performance and stories are completely raw. Their distinctive vocals and outstanding guitar playing are intensified by the simplicity, their songs relatable yet mysterious. A unique singer-songwriter, Mo's music has been described as both folk and pop.

2023 touring includes the US, the UK, Europe and Canada.

On their latest single, "With You," Mo Kenney dissolves into the hazy fog of a relationship's post-mortem over dreamy strums and a faintly pulsing drum machine, reflecting on dashed dreams, miscommunications, and moments of quiet connection. - Pulse
